

STRUCTURED HIRING & ATS ARCHITECTURE LAB

Evidence over instinct.

A privacy-first enterprise hiring system for a fictional precision manufacturer—built to keep automated screening and structured evidence reviewable across 4,000 applications.

100% synthetic

5 requisitions

4,000 applicants

120 hires

14 UAT scenarios

ARCHITECTURE

Six stages. One controlled evidence trail.

01

Authorize the requisition

02

Blind automated knockout

03

Standard phone screen

04

Work sample + BARS

05

Calibrate + offer

06

Transfer + purge

CONTROL 01

Safe batch automation

Versioned job rules, idempotent transitions, human review, appeal, and kill switch.

CONTROL 02

Locked before discussion

500 finalists are scored independently before panel evidence becomes visible.

CONTROL 03

Timed accountability

2,000 events follow the 24-hour reminder, 48-hour breach, and 72-hour hold.

A stronger story cannot outrank stronger evidence.

Composite =
0.40 × Work Sample
+ 0.40 × Structured BARS
+ 0.20 × Job Knowledge

CAND-2026-0013
Halo-effect control case

Subjective impression	4.60
Governed composite	3.92
Reviewable gap	+0.68

FAIRNESS + PRIVACY

Monitor outcomes without exposing people.

Reference progression

624 / 2,400

Focal progression

Knockout-progression impact ratio

0.87

- Cohorts hidden from screeners and panels
- Counts shown beside rates
- Later-stage flags remain visible
- Four-fifths is a rule of thumb—not proof
- Rejected résumés queued for 180-day purge

A portfolio artifact built like a controlled product.
