

Skills-based growth, made visible.

A governed L&D planner connecting skill demand, talent calibration, individual development, and operational evidence.

Workforce

70

Synthetic profiles

Mastery

81.4%

Active IDPs

58

From ontology to evidence—without losing the decision trail.

01

Define demand

20 competencies with O*NET 31.0 provenance, local targets, assessment standards, owners, and versions.

Target 4.12

02

Diagnose gaps

Source-reconciled proficiency evidence converts current capability into a visible development queue.

Current 3.64 · gap -0.48

03

Activate IDPs

30/60/90-day milestones connect practice, mentor feedback, protected learning time, and reassessment.

70 governed plans

04

Evaluate transfer

Reaction, learning, behavior, and results remain distinct—completion never silently becomes mastery.

L2 88.6%

A nine-box conversation aid—not an algorithmic verdict.

14

Star Talent profiles

HIGH POTENTIAL Emerging Potential 4	HIGH POTENTIAL High Potential 8	HIGH POTENTIAL Star Talent 14
MODERATE Development Focus 6	MODERATE Core Contributor 16	MODERATE High Performer 8
LOW POTENTIAL Priority Support 4	LOW POTENTIAL Effective Contributor 5	LOW POTENTIAL Trusted Professional 5

Three safeguards

- 01 • Evidence. Job-relevant performance and a stated future-role horizon.
- 02 • Calibration. Challenge opportunity, recency, visibility, and affinity bias.
- 03 • Agency. Explanation, access, correction, and human review.

Learning evidence with an attribution boundary.

L1 · REACTION

4.6

92% satisfaction signal

Was the experience relevant and usable?

L2 · LEARNING

88.6%

Synthetic score mean

What knowledge or skill changed?

L3 · BEHAVIOR

81.4%

Aggregate mastery

Is critical behavior visible on the job?

L4 · RESULTS

+24.6%

Yield · scrap -18.2%

₹4.8 lakhs savings at governed cohort grain.

Association ≠ causation

PRODUCTION READINESS

Scale the controls before the scores.

The portfolio proves the information architecture. A real implementation earns trust through local validation, employee voice, secure access, and evaluation discipline.

O*NET provenance

IDP RACI

LMS audit trail

Privacy by design

1

Validate locally

Behavior anchors, assessors, access needs, and targets.

2

Protect employee agency

Explanation, correction, challenge, and human review.

3

Instrument the workflow

Versioning, idempotency, reconciliation, and rollback.

4

Pre-register results

Outcome window, comparison logic, and confounder log.
